

# Weather and Nature

Here is the calendar of the weather and nature that you can enjoy at Sakura Guesthouse. All the fruits, flowers and animals on this calendar can be found or enjoyed in our garden. We not only have the Sakura (Cherry blossoms) but also lots of sweet cherries later in the year! The best tourist season here is from April to October. The typical climate is dry with low humidity and the temperature difference between the middle of the day and the morning/night is normally at least 10 °C. It seems quite cool in summer during July and August, but it occasionally gets over 35 °C during the day and the sunshine is quite strong. On the other hand, in the morning and at night it becomes cooler and very comfortable but sometimes you might feel it's cold. Other than the temperature, the sun sets late, close to 10pm in summer time, so you can enjoy the day and evening for much longer. Because of the warm, light summer evenings, there are a lot more outdoor events ( Brocante, Gourmet food festivals and Night Markets etc) between the months of April and October.

	1月	2月	3月	4月	5月	6月	7月	8月	9月	10月	11月	12月
